EXPERIENCE

NOV 17 – PRESENT	INFOSYS	SENIOR SYSTEMS ENGINEER
APRIL 16 – OCT 17	INFOSYS	SYSTEMS ENGINEER
NOV 15 – OCT 17	INFOSYS	SYSTEMS ENGINEER TRAINEE

PROJECT WORKS

DASHBOARD DEVELOPEMENT

Technology   : HTML5/CSS3, Bootstrap4, JavaScript
IDE/Tools   : Visual Studio Code, Brackets, Eclipse
Description   : A platform where all the upcoming events that must be done by team in upcoming weeks are flashed. Trending blogs are published. Onsite/Offshore communication channel is created over there if some generic information need to be passed. Also, Recordings/Sessions were stored to make every employee up to date.
Role   : My role was to design the UI part of the dashboard.

APPLICATION SUPPORT & MAINTENANCE

Technology   : HTML5/CSS3, Bootstrap4, JavaScript
IDE/Tools   : Visual Studio Code, Brackets, Eclipse
Description   : Adding functionalities and debugging bugs in already exiting application. Also, providing post implementation support for limited period to analyze the newly functionality added.

Role   : Adding UI related functionalities and debugging bugs.

AUTOMATION PART

- ServiceNow Ticket Logging Automation

Worked on automating Ticket creation and acknowledging mails in Service Now. Selenium and R language are widely used to complete this automation script. I have worked on Functional part (flow of automation work) and on selenium in this project.

- PCX Application Access Ticket Automation

Worked on automating Ticket creation and acknowledging mails in Service Now. Selenium and R language are widely used to complete this automation script. I have worked on Functional part (flow of automation work) and on selenium in this project.

- Weekly Status Report/Monthly Status Report (WSR/MSR)

From Offshore Team, I am working as Editor/Reviewer to create and present Weekly/Monthly Status Report to Clients for Frontline as well as for Advance Team

PUBLIC PROPERTY MAINTENANCE APPLICATION

Language   : HTML5, CSS, Bootstrap 4, JavaScript
Tools/IDE   **:** Visual studio Code
Description   **:** An app that supports proactive and reactive maintenance of public properties and spaces like roads, streetlights, dustbins, gardens etc. My role was to design a front-end interface for the application through HTML/CSS and Bootstrap. A kind of ticketing system for the application was developed. For every new maintenance activity, a ticket needs to be logged which will be monitored and will be updated according to the work being done.

ENHANCEMENT OF APPLICATION FLOW

Description: Added and modified existing SQL procedures to flow data between two applications according to the business users need using Oracle 10g database.
Team Size : 1

ACHIEVEMENTS

- Recipient of **Google | Udacity Front End Nanodegree** Scholarship.
- Certified in **Digital Marketing by Google Digital Unlocked**.
